

Dear Sports friends,

A month back I offered all my imported pigeons for sale at TOP PIGEONS.

With regret in my heart, I now offer you my best fly and breeding pigeons up to 2016. After the death of my wife early this year and my old age it all became too much.

It is now 10 years that I live in "DE KAAP" and in Somerset West where it is nice to live but the winter and the mountains play a big role in the competition season.

It is now 8 years that I fly pigeons here and only as in Belgium on (total) Widowhood, sometimes a week with cocks, the other week with hens. Difficult in winter with short days and cold nights, but my pigeons make the best of it. I have never flown on nest on those 8 years, even with yearlings, always divorced.

For my pigeons, I have always been very strict and only the best were allowed to survive both to fly and to breed. Only the best was good enough to be allowed to eat VANROBAEYS products from Belgium and have always been a big opponent of medikatie.

I wish the buyers a lot of success and can always contact me for advice and assistance. Greetings,

Michel De Becker.
