

Sentrale Provinsiale Hok

Bloemfontein

Die Sentrale Provinsiale Hok het 11 jaar gelede ontstaan en ons poog om jaar na jaar te verbeter en om hoë standaard wedvlugte aan te bied. Ons wedvlugroete strek suid vanaf Bloemfontein oor die Karoo tot in Matjiesfontein. Die Karoo is bekend vir uiterste weersomstandighede en hierdie jaar het ons dit weereens beleef. Ons wedvlugte het gewissel tussen ongeveer 1450 m/s tot 960 m/s. Die gemiddelde spoed vir 2021 was 1280 m/s.

The Central Provincial Loft was established 11 years ago and we strive to improve year after year and to offer high standard races. Our race route stretches south from Bloemfontein across the Karoo to Matjiesfontein. The Karoo is known for extreme weather conditions and this year was no exception. Our races ranged from a velocity of about 1450 m / s to 960 m / s. The average velocity for 2021 was 1280 m / s.

Hierdie jaar was die Matjiesfontein Challenge bitter hard en en die hitte en sterk rukwinde oor die Karoo het sy tol ge-eis en alhoewel ons groter verliese as gewoonlik gehad het is 76% van die duive is weer terug by die hok.

This year the Matjiesfontein Challenge was very tough and the heat and strong gusts over the Karoo took its toll and although we had more losses than usual, 76% of the birds sent are back at the loft.

Ons beleef dit dat die kwaliteit van die ingeskrewe duive jaar na jaar verhoog en dat die kompetisie al hoe harder word. Elke deelnemer behoort trots te wees om teen so 'n groot hoeveelheid hoë standaard duive mee te ding.

We are experiencing that the quality of the birds entered is increasing year after year and that the competition is getting tougher. Every participant should be proud to compete against such a large number of high standard pigeons.

In die lig van die hoë standaard duiwe wat aan die Cream of the Crop Veiling gaan deelneem het ons besluit om ook met ons veiling ons horisonne te verbreed en van die beskikbare tegnologie gebruik te maak om meer blootstelling aan die duiwe te gee. Ons gaan dus hierdie jaar van **TOP PIGEON** gebruik maak om die Cream of the Crop Veiling aan te bied. Duiwe sal dan in kleiner groepe aangebied word in 'n poging om die bes moontlike prys vir ons deelnemers te verkry.

In light of the high standard of pigeons that will participate in the Cream of the Crop Auction, we decided to broaden our horizons with our auction and use the available technology to give more exposure to the pigeons. This year we are going to use **TOP PIGEON** to present the Cream of the Crop Auction. Pigeons will then be presented in smaller groups in an effort to obtain the best possible price for our participants.

Die veiling wat dus jaarliks by die hokke aangebied was sal dus nie hierdie jaar plaasvind nie. Daar sal dus ook nie 'n amptelike prysuitdelingsfunksie wees nie, aangesien ons nie van deelnemers kan verwag om groot koste aan te gaan vir 'n 30 minuut prysuitdeling nie. Deelnemers sal egter nog steeds hul sertifikate en foto's soos elke jaar ontvang.

The annual auction at the loft will therefore not take place this year. There will also be no official prize-giving function, as we cannot expect participants to incur large costs for a 30-minute prize-giving function. However, participants will still receive their certificates and photos as they do every year.

Die lys van veilingduiwe word aangeheg en is ook beskikbaar op ons webwerf www.centralprovincialloft.co.za onder Veiling. Maak asb seker om ons so gou moontlik te voorsien van 'n pedigree/strain van die duiwe wat veiling toe gaan om in aanmerking te kom vir u kick-back.

The list of birds up for auction is attached and is also available on our website www.centralprovincialloft.co.za under Auction. Please make sure to provide us with a pedigree / strain of the pigeons going to the auction as soon as possible to receive your kick-back.

Die hokke is reeds oop vir die 2022 inname. Stuur gerus u duiwe en neem deel aan die grootste winterhok in die land met meer as 1,100 jongduiwe en 400 ou duiwe!

The loft is open for the 2022 intake. Send your youngsters and take part in the largest winter One Loft in the country with more than 1,100 young birds and 400 old birds!
