

## TITA – ZA OP 5400 '24

For a young bird that is less than 6 months old to distinguish himself at Dinokeng – a gruelling race schedule which brings out the best of the best – Titan for his namesake must be an exceptional bird with loads of potential.

### *Schwormstedt meets September*

**Bred off a cock named Jadyne (his nestmate won a hotspot CTIOLR). Karl Schwormstedt (Ace Pigeon Fancier Western Cape) when crossed with Federated Board Ace Pigeon Fancier Ashley September genetics**

#### **ZA NRHU 6404 '21 (This is Jadyne)**

A fantastic all round who together with his nestmate excelled at Cape Town International One Loft Race. In 2022 Jadyne bred a hotspot winner. His Sire is from the old ZAEP Goosen line, and his dam is a double combine winner – the dam's genetics are from famous Cape Town fancier Karl Schwormstedt. Tough hardy bird with plenty of fighting spirit.

#### **ZA FBHU 1483 '20 (This is Mama Mia)**

Mama Mia was bought as part of a strategic investment to improve the ZAEP teams long distance abilities. She was bought from Ace Pigeon Fancier Ashley September and is now part of a long-distance bird project. Her strain is a combination of at least 6 strains and include Sablons.
